What do we see?  
Three glasses?

What do we see here?

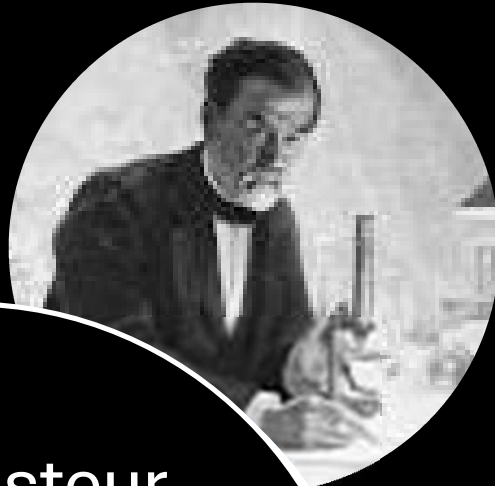

Did You Spot the Silver Lining?

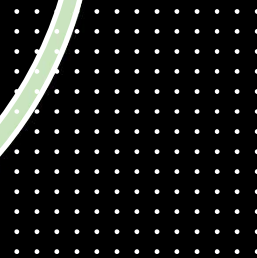

# Can You Spot a Silver Lining?

- A rainy day when we were hoping for sunshine
- Your favourite toy has been broken
- A day out you had been looking forward to has been cancelled.
- A good friend is off school.
- You have been in trouble for doing something wrong.
- Something has been difficult in school.
- When you feel a bit blue? (Bored, sad, upset, worried)

Louis Pasteur-  
Penicillin.  
Learnt by a mistake in  
his work.  
A Silver Lining for us  
all.

A Scientist who was frustrated by his mistakes in science.

Looked hard and discovered something special.

Used that information for improving his study.

Discovered how to create a vaccine and medicine- now used all over the world and has saved millions of lives.

# Dig Deep- Spot the silver lining

Didn't get the role you auditioned for

Didn't get into the team

Couldn't do a trick on your bike or skateboard

Even When things are tough, a silver lining is a reminder of:

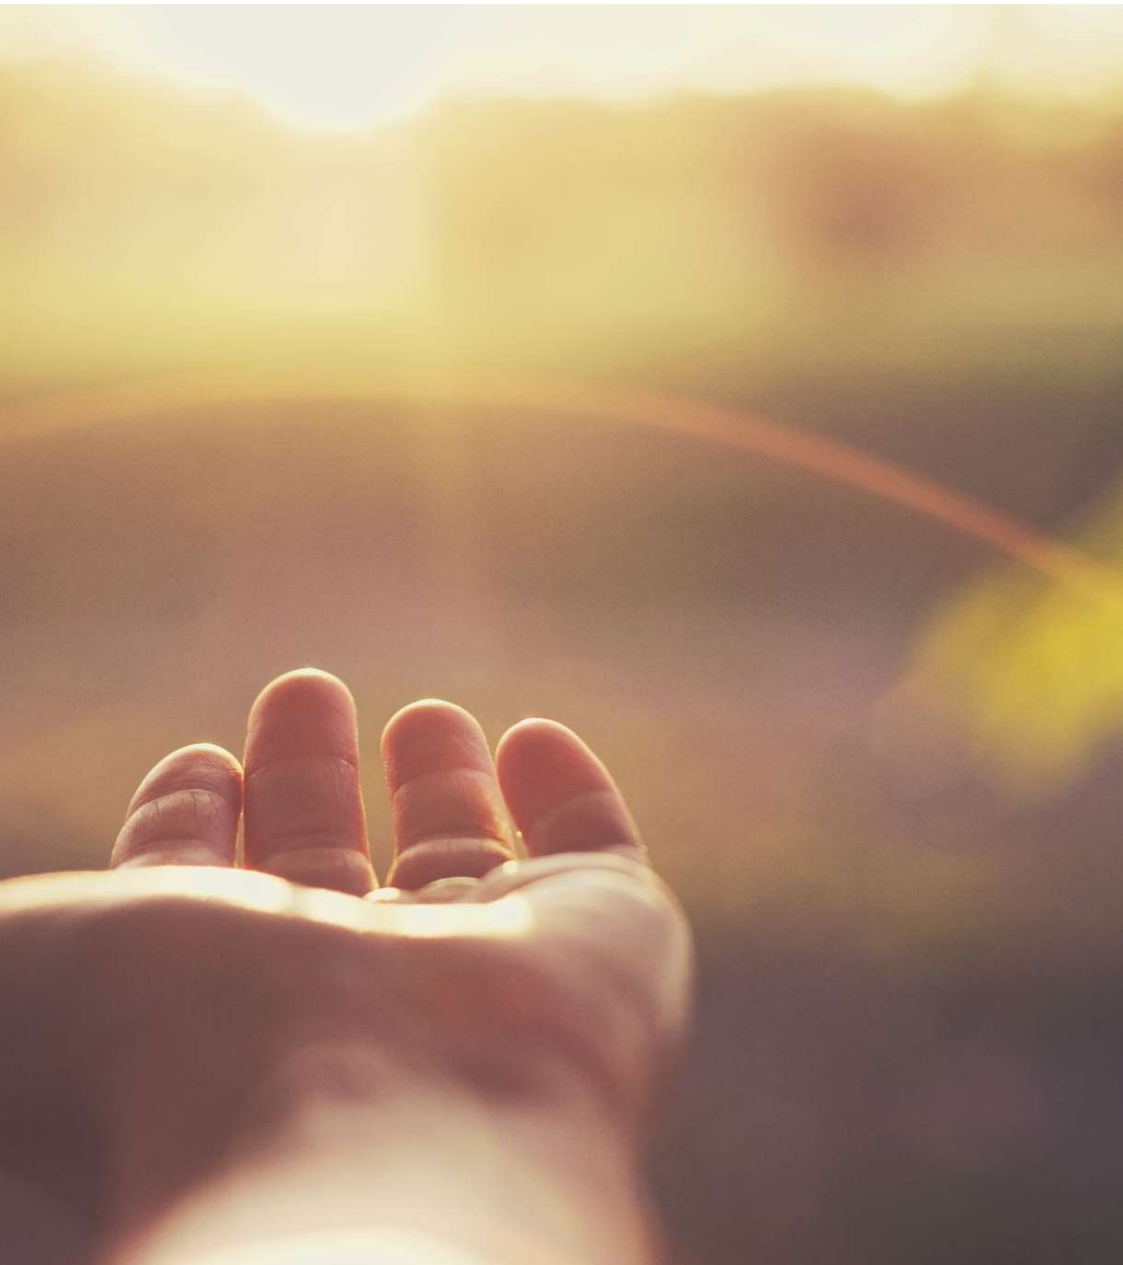

A little bit of hope

Something better will happen.

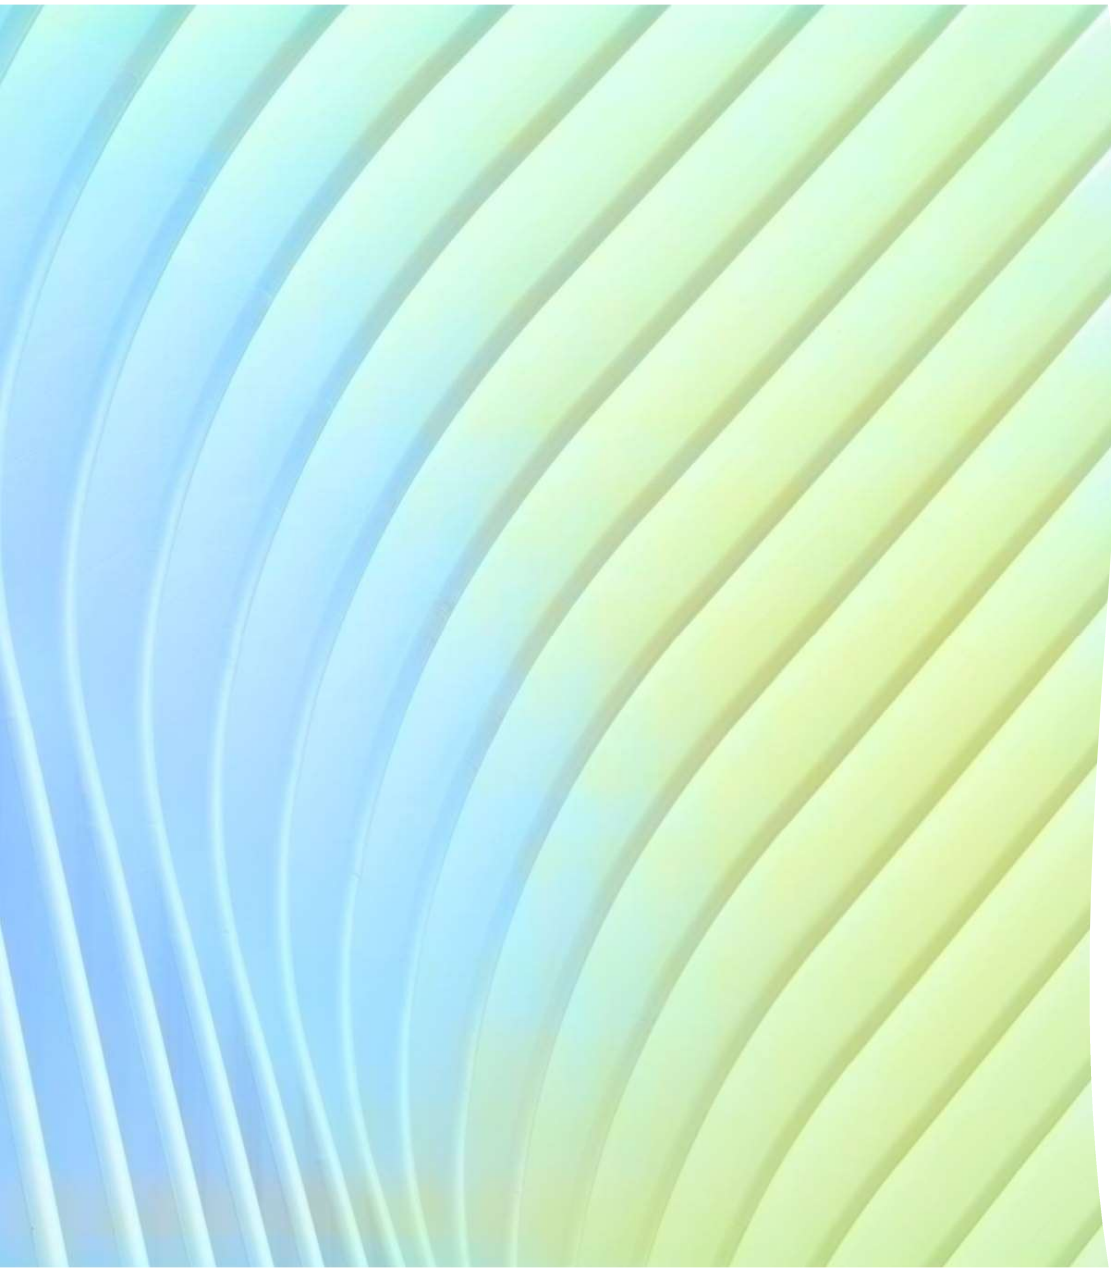

Every tough situation has something good that comes of it.

## Next time things are difficult.

- Don't give up
- Keep things in perspective- how big an issue is it?
- Look for the good things in every situation.
- Be thankful for what we have.

What can we all improve upon?

Optimism

Resilience

Kindness
